The Academy reserves the right to increase all fees and tuition without notice, at its discretion.

All students enrolled in a design program are required to purchase a design kit during their first term that will be used throughout the duration of their program. In addition, all students are required to purchase textbooks for their courses on a term-by-term basis. Design kits and textbooks will be made available to students for purchase, but students have the option to purchase these items on their own if so desired.

Students may also purchase a laptop computer for use in their program, although the purchase of such equipment is not mandatory. Laptop computers and selected software may be made available to students for purchase by a third party.
